

Subject: May 29th, 2014 TCI Tree Injection Summit Follow-up Email

Dear 2014 TCI Tree Injection Summit Attendee:

It was a pleasure for me to join you in attending the recent TCIA Tree Injection Summit held at the LA County Arboretum and Botanical Garden in Arcadia, CA. The exchange of ideas was valuable and the various presentations by the panel of speakers were a great educational experience.

As a leading manufacturer of tree microinjection systems, my company strives to continuously develop economical and environmentally-safe microinjection methods and products for forest and ornamental tree applications. As traditional methods of pesticide and fertilizer treatments become more restricted in today's increased regulatory environment, opportunities improve for tree microinjection usage.

I have included a link to our website for your review so that you can become more familiar with our Tree Tech microinjection system, the pesticide and fertilizer product lines, and the supporting technical information. For additional data, please contact us at 1-800-622-2831. Our web address is www.treetech.net. I hope you will take the time to visit.

I appreciate your participation at the seminar and sincerely hope you consider Tree Tech as your first choice when choosing a tree injection system.

Sincerely

A handwritten signature in blue ink that reads "Roger S. Webb". The signature is written in a cursive, flowing style.

Roger S. Webb, Ph.D.
President, Tree Tech Microinjection Systems
